

EXPRESSION OF INTEREST

IN PARTICIPATING AS PARTNERS IN ERASMUS+ PROJECTS

We are a research team based at the Department of Physical Education and Sport Science (DPESS) of the University of Thessaly (Greece). We seek **to participate as partners** in Erasmus+ Key Action 2 **Strategic Partnerships projects**.

We specialize in the utilization of ICT (Information and Communication Technologies) in education (both secondary and tertiary) as well as in the utilization of ICT in physical education and health education. We are interested in the development of ICT applications (e.g. digital games, mobile applications, web-based applications) that: a) promote learning of concepts and skills (e.g. ICT-related concepts and skills) by educators and young people, and/or b) promote physical activity among young people, and/or c) promote health-related knowledge and positive health behaviors among young people. We are also interested in contributing in the evaluation of interventions that make use of such applications (once they are developed).

Head of the team and contact person:

Marina Papastergiou, PhD

Assistant Professor in Informatics in Education and Digital Learning Media for Physical Education

University of Thessaly
